

Academics At NCCA

Our academic curriculum is fast paced and challenging, enabling students to meet and surpass both state and national standards. The program of study at NCCA has been developed from a combination of Christian [A Beka and BJU Press] and secular resources, and is consistent with the philosophy and purpose of the school. Math, science, literature, grammar and history are all taught daily by qualified caring teachers.

Students receive daily Bible instruction and attend weekly chapel services. Faculty and staff members are born again believers in Jesus Christ; therefore children also develop their faith through the Godly example of their teachers.

In addition to academics and Bible, our students receive weekly instruction in the visual arts, music, foreign language and physical education. Students also receive weekly instruction in computer technology in our state of the art computer lab.

New Castle Christian Academy offers an outstanding educational experience to each student. Our curriculum is advanced and our students rise to the top as we also building in a strong Christian foundation into our curriculum. Below is a list of our educational areas.
